

DATA SHEET
COMMON POINT GROUND
(Model: CPG)

As per ANSI/ESD S20:20 all conductors including Personnel must be electrically connected and attached to a known ground.

Operators need a convenient method of grounding their wrist straps in the work stations. The Common Point Grounds are designed for the use of workstations to bring the grounding connections at the same potential.

Model: CPG-4P

Model: CPG-2P

FEATURES:

1. M.S powder coated is designed to mount under bench, saving work surface space.
2. Two meter grounding cable, at one end LUG provided for attachment to ground.

Note: The specifications mentioned in this datasheet are subject to change without prior notice due to our continuous research of product development, Buyer or User should decide the suitability of the product for the intended application.
